## You are Invited to Participate in the Parks & Recreation Master Plan Update September 22

Glendale residents are being asked to attend the third community workshop to provide input on the development of the priorities and the future of Glendale's parks and recreation system.

The department is in the process of updating the existing Parks and Recreation Master Plan. The master plan identifies community priorities for recreation and park facilities along with outlining a plan of action.

**The public workshop will be held:  
6:30-8:30 p.m.**

**Wednesday, September 22  
at the Glendale Adult Center

This meeting will feature draft information on the Community Values and Strategies sections of the plan. These sections represent the prevailing feedback gathered during the past several months from residents, community organizations, leaders and staff.

Glendale residents' input during the planning process is critical to help establish priorities for current and future parks and recreation services, programs and facilities offered within Glendale. For more information, call Glendale Parks and Recreation at 623-930-2820 or [click here](#).

Glendale's 18 boards and commissions assist the City Council in making important policy decisions that impact the community. These volunteer citizen advisory groups research, study and discuss specific Glendale projects and issues and then forward their recommendations to the City Council.

**Countdown Pedestrian Signals.** Glendale will soon receive funding through the Arizona Department of Transportation (ADOT) from the federal government to install pedestrian countdown signals at 23 intersections in the city.

This project will increase safety for both pedestrians and drivers. Pedestrian countdown signals use flashing numbers to countdown the number of seconds remaining until the end of the pedestrian crossing phase at a signalized intersection. With the addition of these countdown signals, pedestrians can judge whether they have enough time to complete their crossing and adjust their speed accordingly.

Through the Federal Highway Safety Improvement Program, ADOT will handle the procurement process. For more information on transportation projects in Glendale, call 623-930-2940 or visit [www.glendaleaz.com/transportation](http://www.glendaleaz.com/transportation).
